

ProSportMed

The Announcement Blockchain Project

Currently, sports medicine does not have a simple, universal and objective diagnostic technology of physical shape. All athletes, coaches and physicians are very interested in such technology.

ProSportMed Whitepaper will outline the vision on diagnostics technology of physical state at present and offers the spread and implementation worldwide of a new unique universal medical diagnostics technology of physical shape at rest (without loading) which has been implementing in Russia, Belorussia and Kazakhstan since 2010 year.

ProSportMed uses blockchain technology to distribute and implement worldwide of a new unique universal medical diagnostics technology of physical shape.

ProSportMed manufactures and sells a worldwide medical device for the diagnosis of physical condition.

ProSportMed enables to carry out hardware-software diagnostics physical state level with the aid of a medical device.

ProSportMed then records this data in an auditable, transparent and secure way on ProSportMed's distributed ledger.

ProSportMed enables the athlete to give healthcare professionals, coaches, managers and others access to their personal physical health data.

The first important feature of proposed new diagnostics technology is that it can be used in all diseases and injuries, as survey one athlete is performed in the horizontal supine position in a quiet relaxed state.

The second feature - diagnostics technology works both in children and adults.

ProSportMed provides monitoring of the dynamics of physical state, detecting the causes of its decline and evaluating the effectiveness of any rehabilitation measures.

ProSportMed raises sports medicine to a new level, helping athletes, coaches and sports doctors not only measure the physical state, but also to be active in its correction, contributing to the growth of sports results.

This Whitepaper is the result of collaboration between physicians, allied health professionals, scientists, athletes, trainers, blockchain specialists and business consultants.
